

# ESP Achieving Great Heights

## SFS Installed High Bay Wall Profiles

### High Bay Walls

ESP's High Bay wall profiles can provide high separating walls usually found in factory units, sports halls and warehouses. Our high bay profiles can be up to 18m high and because of the lightweight construction, rarely need additional foundations underneath the wall. ESP can offer a variety of profile sizes, with studs 70mm up to 350mm in gauges from 1.2 to 3mm.

### ESP PERFORMANCE GUARANTEE

Efficiently supply your demand for drywall systems and profiles, fast delivery, on time and in full

Support your sales team with tailored training to increase sales and increase your profits

Produce quality SFS profiles manufactured to the highest standards

### Logistics

- National Delivery Schedules
- Bespoke lengths cut to size
- On Site Technical Team
- Deliveries Direct to Site
- A variety of profile sizes

**For more information call the ESP team on 01753 30 60 50**

### Design & Technical Expertise

**Our technical team will also review specific design criteria including wind-loading, fire-resistance, humidity and acoustic regulation requirements, all ideal for installations where lighter gauge drywall systems are unable to achieve the necessary height, or accommodate lateral loads**
