

Welcome to the ESP Drywall brand, a comprehensive range of drywall metal profiles and systems, manufactured from our London factory, the latest and most exciting UK drywall manufacturer to launch in London.

## About Us

With a wealth of experience in reliable distribution, strong relationships with merchants and quality drywall manufacturing, both directors Andrew Day and Gerry Tuohy have seized this opportunity to deliver a professional range of metal products to the UK and Europe.

We hold great stocks and can manufacture bespoke lengths to order. Our location provides great access for your vehicles and we can deliver on time and in full within 48 hours from receiving your requirements.

## The Directors

### Operations Director

Andrew lives in Ealing with his wife and family. He enjoys supporting England Rugby from the terraces and enjoys great food and wine with his friends. His relevant commercial experience spreads over 30 years within the building industry, suspended ceiling and drywall distribution and successfully managed Richter with Gerry for over 20 years.

### Sales Director

Gerry lives in Penn with his wife and daughter and is a keen footballer. He supports Spurs and can often be seen at WHL. His relevant commercial experience spreads over 30 years within the building industry, fit-out, ceiling and drywall distribution and successfully managed Richter with Andrew for over 20 years.

## Metal Products

The comprehensive range of drywall profiles manufactured by ESP include all standard size "C" Studs, "U" Tracks, Furring system, Lining system, "I" studs, Resilient bar, Acoustic studs, European dimension studs, treated support systems (for swimming pools) & lining systems (for external wind load applications) complemented by components and fixings.

ESP has recently commissioned additional production lines and has a comprehensive base stock holding, available for delivery or collection.

“ As an existing customer, I am pleased to endorse ESP (Gerry and Andrew) and have been impressed with the availability and delivery of both standard stock requirements and the turnaround for bespoke profile lengths . I wish the guys well! “  
Group Buyer, Midlands

## Performance

We are pleased to confirm that the ESP drywall range of systems and profiles are manufactured in accordance to BS EN 14195:2005 being the European standard for the production of metal framing components for gypsum plasterboard systems. These are supplied CE with CE marking.

The scope of this standard specifies the characteristics of the metal framing sections used in conjunction with plasterboards (conforming to EN520) used to build non- load bearing partitions, wall and ceiling linings.

We confirm that in accordance with the European standards, all products are manufactured using galvanized steel coils DX51D as BSE EN 10326 and 10327. The reaction to fire is classified on Euroclass A1 being “No contribution to fire.”

Declaration of Performance (DoP) specification data sheets and safety data are available for all products all in accordance with BS EN 14195.

## The “ESP” Performance Guarantee
